

## Medications to Avoid Before and After Surgery

If you are taking any medications on this list, they should be discontinued 14-21 days prior to surgery and only TYLENOL should be taken for the pain. All other medications that you are currently taking must be specifically cleared by Dr. Garramone prior to surgery. It is absolutely necessary that all of your current medications be specifically cleared by Dr.

Garramone and nursing staff. Common medications that are taken are Aspirin, and Aspirin Products, Anti-Inflammatory drugs such as Advil, Aleve, Nuprin, Alka Seltzer, Pepto-Bismol and Various Herbs. Also stop taking diet medications. You may take multivitamins.
